

Simple Steps To Prevent A Dryer Vent Fire From Happening In Your Home:

- ✓ Do not use the dryer without a functional lint filter. Make sure you clean the filter before or after each use. Remove any lint that has collected around the drum.
- ✓ Verify that the exhaust vent pipe is not restricted and that the outside air flap opens while the dryer is operating.
- ✓ Routinely keep the dryer maintained to ensure safety and good working order. Have gas dryers inspected by a qualified professional to ensure the gas line and connections are free of leaks. Dryer vent specialists will remove any lint that may have built up along the exhaust vent.
- ✓ Be certain that the correct plug and outlet are used and that the hookups are connected properly.
- ✓ Always follow the manufacturers operating instructions.
- ✓ Turn off the dryer before you leave the home or go to bed.

Hidden Dangers of a Blocked Vent:

- Failure to clean the dryer or connecting vent has always been the #1 reason for a fire.
- Reports state that the first items to ignite are lint, fiber, and dust.
- Unmaintained dryers can also cause electrical fires and leak Carbon Monoxide. Vents can be clogged by birds nests or improper vent pipe.
- Residual water that is expelled from the clothes when being dried can not evaporate when the vent is clogged. The results are; mold, bad odor and health risks.
- Home fires involving clothes dryers from 1980-2010 have gone down from 24,100 a year to 16,800.

We believe the decline in dryer vent fires over the years are in part due to public awareness. Knowing how to properly install, maintain, and clean a dryer, are key steps to protecting your home.

Warning Signs Your Vent Needs Servicing:

- ! Clothing is hotter than normal.
- ! Drying time takes longer.
- ! Laundry room feels hotter.
- ! Increased lint collection.
- ! Clothes or laundry room smell moldy.
- ! Unexpected rise of utilities.

Benefits of a Cleared & Inspected Dryer Vent:

Cleaner Clothes Means A Healthier You!

- ✓ Mold growth can lead to an array of unnecessary health issues.

Extend the life of the dryer.

- ✓ Heating elements and other components will last longer.

Increase Energy Efficiency = Lower Utility Bill.

- ✓ With the dryer maintained and vents cleared, the dryer can work as intended.

Prevent Fires & Carbon Monoxide Poisoning.

Secure the safety of your home, yourself and your loved ones!
