

WHETHER IT'S AMBIANCE...

OR HARDWORKING HEAT...

VENTIS® CLASS-A Is your venting solution!

Ventis Class-A is also used for venting coal,
natural/ propane gas and oil appliances

Venting Safely with the VENTIS® CLASS-A All-Fuel Chimney System

Your chimney venting system has a **big responsibility**. It carries toxic gases out of your home, and while doing its job, it must withstand constant attack by acid, creosote and extreme temperature changes for years on end!

With the real risks of carbon monoxide poisoning and chimney fires becoming house fires, venting is a **serious responsibility**.

The Ventis Class-A, All-Fuel Chimney System is built to handle the **big and serious responsibility** of safely venting your heating appliance. This system is manufactured in America, at our factory in Scranton, Pennsylvania. Ventis Class-A is made from 100% stainless steel on the inside and outside casing of each insulated pipe section. Each section is joined together by stainless steel hardware to ensure a secure, long-lasting venting system.

The most respected and recognized testing laboratory in the world, Underwriters Laboratories, has tested and certified the Ventis Class-A system to exceed its standard for chimney safety (UL103HT). Ventis has been tested to withstand multiple chimney fires and still maintain structural integrity. Underwriters Laboratories testing and ongoing factory inspections is your assurance of safety and product quality for each and every Ventis system produced!

Ventis is built to last and built to look good as well. Our mirror finish 430 stainless steel outer casing has a clean, attractive appearance. No Class-A system has as many rain cap options to meet your venting requirements as well as your personal taste. Our roof flashings, exterior wall support brackets and telescoping roof braces are available in optional all stainless steel to enhance its long-lasting beauty.

A quality product is the foundation of an unsurpassed warranty. Ventis Class-A carries the exclusive Forever Warranty, the first Class-A warranty that is transferable to the next homeowner. No fine print in this warranty- just peace of mind. Read on to learn more about the quality construction of Ventis.

It All Begins with Superior Ventis Insulated Pipe

Industry Exclusive Ventis Thermal Web®

- Reduces heat transfer to outside of pipe
- Allows for thermal bridging between pipe sections
- Joins inner and outer pipe while permitting expansion and contraction of inner pipe
- Reinforces fastening system 360 degrees

VENTIS® COMPONENTS THE PERFECT MATCH

VENTIS® BLACK STOVE PIPE

Safely Connecting **Class-A** Chimney to Your Heating Appliance

Way to Connect! Most heating appliances require connector pipe between the chimney and the appliance itself. The chimney may be Class-A pipe or a masonry chimney. This black connector pipe is a critical component of the venting system! First, it must safely convey flue gases to the chimney without leaking into the home. Secondly, it must have the proper clearance to combustibles. And lastly, it better look good because it is the visible part of the venting system. Ventis Black Stove Pipe, in single or double wall, is the clear choice!

VENTIS **SINGLE WALL** Black Stove Pipe

The Difference is Obvious

- Manufactured from Heavy Duty, 22 Gauge, Cold-Rolled Steel.
- "Patent Pending" Fume-Free finish eliminates the smell of initial firing.
- Perfectly Round, Perfectly Fit Pipe to Pipe with our Smooth-Weld™ and end forming technology.
- Ten year limited warranty.

VENTIS **DOUBLE WALL** Black Stove Pipe

The Difference is Obvious

- Fume-Free - No more fumigating effects on initial firing.
- Stronger, more durable pipe- Outer wall is made from 24-gauge Satin Coat Steel.
- Free Air Flow- Our Thermal Web® creates a continuous and consistent air flow and a cooler outer pipe temperature.
- Variety- The industry's best selection of pipe lengths, slip sections and telescoping sections.

ABOUT US- THE OLYMPIA STORY

Olympia Chimney Supply has over 25 years of venting background and experience. At Olympia we are committed to advocating and promoting the safe venting of home heating appliances. We work closely with national safety institutions such as the Chimney Safety Institute of America (CSIA). Our affiliations with industry organizations such as the National Chimney Sweep Guild (NCSG) and the Hearth, Patio and Barbeque Association (HPBA) keep us in the forefront of meeting the venting challenges of modern heating appliances.

The Olympia commitment to a quality product starts with innovative design and engineering. We continue this commitment by working with the world-class testing and listing agency, Underwriters Laboratories (UL). UL not only tests our products to its high safety standards, but in addition their factory inspections ensure that each system produced continues to measure up to this high standard. Our quality is also evident from the raw materials we use - only prime stainless steel from the best steel mills.

Olympia calls home what we like to call "the heart of industrial America", Scranton, Pennsylvania. Scranton is home to steamtown locomotives, coal mining, iron ore, and a legacy of hardworking Americans. The Olympia Family takes what we do to heart and knows that your family is relying on us to deliver a safe, quality product.
